What is a Computer?

A computer is a machine that helps us work faster. It can store information, play games, show videos and help us learn. A computer has a monitor, keyboard, mouse and CPU.

Input and Output

The keyboard and mouse are input devices because we give information to the computer with them. The monitor and printer are output devices because they show results.

Stay Safe Online

Never share your password with anyone. Ask a teacher or parent before downloading anything. Be kind when you chat with others. Take a break from the screen every 30 minutes.
